Droid WPA2 Configuration

Follow these steps to set up your Android device running Android 2.0.x and above to use WPA2 encrypted wireless at Pace.

1. Configure your Wi-Fi.
   * Select Settings.
   * Select Wireless & Networks.
   * Select Wi-Fi Settings.

2. Select the encrypted wireless service.
   * Under Wi-Fi networks, select Pace_Secure.

3. Configure Pace_Secure option.
   * EAP Method: Select PEAP.
   * Phase 2 Authentication: Select MSCHAPV2.
   * For both CA certificate and Client certificate, leave as N/A.

4. Continue configuring Pace_Secure option.
   * Identity field: Enter your MyPace username.
   * Anonymous Identity field: Leave blank.
   * Wireless Password field: Enter your MyPace password.
   * Click Connect.

5. Verify your connection.
   * Under Wi-Fi, you should see Connected to Pace_Secure.
