iPhone WPA2-Enterprise Configuration.

1. Select the **Settings** icon on the iPhone’s **main screen**.

2. Select the **Wi-Fi** option.

3. If Wi-Fi is OFF, slide it to the **ON** position. A list of available Wi-Fi networks within your range will be listed under the **Choose a Network…** section. Select the **Pace_Secure** network.

4. Enter your **MyPace** account name and password.

5. **Accept** the **Entrust.net** certificate.

6. Once you have accepted the certificate, the iPhone will return to the Wi-Fi Networks window. A **check mark** should be placed next to the **Pace_Secure** network and you will see a **signal bar** appear at the top of the display.
