The Land Use Law Center has launched a Land Use, Human Health, and Equity Project. This project will make accessible effective land use tools for strengthening public health and environmental protections in urban communities in response to the pandemic. These strategies can contribute to communities' healthy and resilient post-pandemic futures while also reinvigorating cities' climate change management capabilities. Through a team of two dozen student researchers led by **Professor John Nolon**, this project addresses climate change and COVID-19 by discovering local solutions. More information on this project can be found on the **GreenLaw blog** [here](#). Additionally, as part of the Elisabeth Haub School of Law and Francis King Carey School of Law Weekly Environmental Law Colloquium series, Professor Nolon spoke last week about this project in his presentation on "Safe Buildings and Neighborhoods- Balancing Property Rights and Government Regulation in Time of Emergencies." Professor Nolon's presentation is available to view [here](#).

A Land Use Law Center report on mitigating the displacement of commercial tenants resulting from new zoning adopted by the Village of Port Chester was adopted by the Board of Trustees of the Village of Port Chester on October 19th. **Samantha Howard** (2L) and **Jonathan Duffy** (2L) conducted nation-wide research on displacement mitigation strategies, consulted with small business owners and other stakeholders, and worked with Center staff to prepare the report, one of the first of its kind in the region. The students' work was done as part of the summer land use externship led by **Adjunct Professor Jennie Nolon Blanchard**, Senior Staff Attorney at the Center.
