

If you are thinking about **Law and Technology** as an area of practice, you are preparing for internships or permanent placements in the following settings:

- Consulting firm or other alternative professional setting

You may do any of the following in practice:

- Advise clients regarding effect of technology on their legal or regulatory position
- Assist clients in planning use of technology in pursuing litigation or corporate strategy

For the professional track in Law and Technology,

You should take at least 3 of the following courses:

- Advanced Civil Procedure: E-Discovery
- Advanced Issues in Criminal Law: Computer Crime
- Communications Law
- Computer Law
- Internet Law: Regulation of Social Media
- Privacy and Information Law

You should take 1 or 2 courses in the Seidenberg School of Computer Science and Information Systems

You should consult with the following faculty regarding this concentration: Anderson, Garfield

Note: Students pursuing this professional track should combine it with courses from the concentrations in Business Law, Civil Litigation/Dispute Resolution, and from the Intellectual Property professional track.
